DETAILED ACTION

Claim Objections

1. Claims 1 and 11 are objected to because of the following informalities: "characterised".

Appropriate correction is required.

Claim Rejections - 35 USC § 102

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1-3, 8-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Aziz (U.S. Patent 5,325,362).

Regarding claim 1, Aziz discloses a method of routing data directed to a mobile node (6) in a communications system, comprising the steps of: maintaining reachability information for the mobile node; and receiving data directed to the mobile node; characterized by setting a destination to which the received data is to be sent when the reachability information indicates that the mobile node is unreachable (See Abstract, Co. 5, line 30 – Co. 8, Line 43, Co. 10, Lines 14-62, Fig. 3).

Regarding claims 2, 3, 8-11, as discussed above in claim 1, meets the limitation (See rejection claim 1).

Claim Rejections - 35 USC § 103

3. Claim 4-6, 12-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Aziz (U.S. Patent 5,325,362) in view of Joong (U.S. Patent 6,134,433).

Regarding claim 4, Aziz disclosed everything as applied above in claim 1. However, Aziz was silent teaching the proxy node to send received data to the mobile node when the reachability information indicates that the mobile node has become reachable. Joong teaches the

proxy node to send received data to the mobile node when the reachability information indicates that the mobile node has become reachable (See Abstract, Co. 4, Lines 18-44, Co. 5, Lines 36-48). Therefore, it would have been obvious to one ordinary skill in the art at the time of the invention to provide above teaching of Joong to Aziz for determining whether an incoming call from a calling party for a mobile station is a data call, determining whether the mobile station is available to take the call as suggested by Joong (See Co. 3, Lines 26-30).

Regarding claims 5-6, 12-14, as discussed above in claim 4, meets the limitation (See rejection claim 4).

4. Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over Aziz (U.S. Patent 5,325,362) in view of Hiyama (U.S. Patent 4,855,995).

Regarding claim 7, Aziz disclosed everything as applied above in claim 1. However, Aziz was silent teaching the reachability information comprises at least one destination address.

Hiyama teaches the reachability information comprises at least one destination address (See Abstract, Co. 4, lines 19-25, 52-67, Co. 5, lines 1-15). Therefore, it would have been obvious to one ordinary skill in the art at the time of the invention to provide above teaching of Hiyama to Aziz to provide effective communications between terminals as suggested by Hiyama (See Co. 2, Lines 5-6).

Conclusion

- 5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
